# IN-RACK GONDOLA

Acrow specifically designed the In-Rack Gondola shelving system for the retail-wholesale chain

This heavy duty rack supported shelving system allows for larger volume of product to be displayed

The In-Rack Gondola allows for storing the bulk stock overhead.

This gives easy access to the merchandise for replenishing the shelves

Efficient space utilization reduces costs by minimizing the size of rear store required to carry stock for replenishing and also eliminates the need for off-site warehousing
